IDENTIFICATION OF DOCUMENT (author, form, addressee, title & length) Memorandum from ██████████ Chief, Global Survey Group to the Ad/ORE. Subject: Intelligence Production Requirements			LOCATION: HS/HC-1009 Item 19 ✓

ABSTRACT

This memo is concerned with a memo of 14 March 1949, delegating to ORE new responsibilities in regard to long-term intelligence requirements production. Mr. ██████████ gives three cases where such production could possibly pertain to ORE: (1) ORE's perception of emergent situations (2) ORE's reception of requirements from NSC, NSRB (National Security Resources Board)*, and JCS and (3) ORE's realization of inadequacies in already existing intelligence used for evaluation. (1) and (2) are discarded as being irrelebant and impossible to institute at the present time respectively. (3) is considered possible but not efficient since it would divert ORE of its main task of evaluation. In any case ORE's basis is not considered great enough to produce such long-term requirements for NSC. Also discussed is the duplication of effort between the Policy and Planning Staff** and the Intelligence Staff*** created by the 14 March memo. Mr. ██████████ states that the functions given to S/PP are superfluous.
